For those with solar installed, the first thing that comes to mind after purchasing an EV is what charging options are available and whether they are compatible with a rooftop solar system. Before we get into detail, it's worth pointing out that most level 2 chargers, also called wallbox chargers, are relatively simple devices that can be installed on any home or business ...

A lot of people want to keep the charging cable with the vehicle just in case and have a separate unit installed

so they don't have to pack it up each day. Also some models only come with a 110v compatible charging cord so we installed a 220v for faster charging.

Here's a general overview of how an off-grid solar system works: Solar Panels: The system includes solar panels, also known as photovoltaic (PV) panels, which convert sunlight into electricity. The panels are typically installed on the roof ...
