

How many volts is 2800 mAh?

2800mAh is equal to 11.1Wh. The voltage of a battery is determined by the chemistry of the cells inside it - for example, lithium-ion batteries have a nominal voltage of 3.6V. Therefore, 2800mAh would be equal to 3.6×11.1 , or 40.56 volts. What Does the mAh on a Battery Mean?

How long does a 2800 mAh battery last?

2800mAh Ni-MH high capacity makes you no worry about the endurance of your devices. Low self-discharge batteries will remain 85% juice when you leaving it for no use 1 year. Super long life ,convenient and more affordable than thousands of alkaline batteries.

What is EBL 2800mAh AA rechargeable battery?

EBL 2800mAh Ni-MH AA rechargeable battery will provide strong power for your devices to performance well and operate longer. 1200 Tech, up to 500 times deep charging & discharging cycles (others normal is 400times) , high quality ensured.

How many amps can a 2800 mAh battery store?

One mAh is equal to one-thousandth of an amp hour (Ah). So, a 2800mAh battery can store two points at eight amps for one hour. The capacity of batteries is usually measured in watt-hours (Wh), but mAh is also a common unit of measurement. For example, an AA-size alkaline battery has about 2200-2600mAh.

How long does it take to charge a 2800mAh battery?

Most of those cheaper chargers put out about 500ma though, which in theory would make the charge time around 6ish hours for a 2800mah battery. The charger may not be outputting what it is supposed to, or maybe there is a problem with the battery itself.

Which AA batteries are suitable for 1.2V devices?

[High capacity & Convenient packaging] HiQuick 4 x 2800mAh rechargeable AA batteries are suitable for 1.2V devices, 4 in one pack is conducive to preservation. [Rechargeable & Long-Life] HiQuick AA batteries have special protective technology and material to extend the life of the battery to 1200 times.
