The size of a lead acid battery, in terms of height, is 9 3/8 inches (238mm). U.S. Battery Manufacturing Co.'s Flooded Lead Acid batteries are engineered and proven to provide the fastest cycle-up to full rated capacity, and have the highest total energy delivered over the life of the battery.

What is the mathematical model of a lead-acid battery?

In this paper, a mathematical representation of a lead-acid battery is presented. This model includes considerations for self-discharge, battery storage capacity, internal resistance, overvoltage, and environmental temperature. Nonlinear components are used to simplify the design of the model and represent the behavior of the different battery parameters.
