

Is 80% charge on a car battery good?

Yes, an 80% charge on a car battery is considered good. Most batteries will have a lifespan of around 5 years or so before they need to be replaced. How Do I Know When My Car Needs a New Battery? One of the most common questions we get here at Battery Depot is "How do I know when my car needs a new battery?"

What is 80% battery capacity?

Basically, today's 80% is yesterday's 100%. The old, worn battery is actually at its full capacity, but that capacity is only 80% of what the battery could hold when it was brand new. There's also a chance that the problem isn't with the battery or the display or any controlling software.

What does 80% battery mean?

The battery indicates 80% (plugged in, not charging). The battery won't charge any further but it won't drop with the power cable plugged. Could anyone advise the solution of this matter to enable the battery fully charged for longer lasting. This thread is locked.

How much does a battery 1 80v battery weigh?

BATTERY 1 SPECIFICATIONS 80V Battery: 2901302 Battery: 80V, 2Ah (144Wh) Lithium-Ion Charge time: up to 30 minutes Weight: 3.22 lbs (1.46 kg) For the proper use, maintenance and storage of this battery, it is important that you read and understand the instructions given in this manual.

How long does a 80% battery last?

According to ASUS, the 80% battery limit takes away around 2 hours from the advertised battery life. The length of time you've left your laptop plugged in affects the accuracy of the battery estimate.
