

What does 80% battery mean?

The battery indicates 80% (plugged in, not charging). The battery won't charge any further but it won't drop with the power cable plugged. Could anyone advise the solution of this matter to enable the battery fully charged for longer lasting. This thread is locked.

How much does batteries scrap cost in the UK?

The average price of Batteries Scrap is £519.29/ton in the UK. What is the highest price for the Batteries Scrap in the UK? The highest price of Batteries Scrap is £702/ton in the UK.

What is 80% battery capacity?

Basically, today's 80% is yesterday's 100%. The old, worn battery is actually at its full capacity, but that capacity is only 80% of what the battery could hold when it was brand new. There's also a chance that the problem isn't with the battery or the display or any controlling software.
