What is a solar panel system?

Solar panel systems are often referred to as PV, or photovoltaic, solar power systems. The home installation of a high-quality solar power system can reduce or eliminate dependence on the utility power grid that supplies electricity to light, heat, cool, and operate your home.

What is solar energy equipment?

Solar energy equipment consists of the components that make up a solar energy system. The installation of the equipment allows for the harnessing of the sun's energy as well as its conversion into the electricity that is necessary for the home or business in question.

What are the components of solar equipment?

Among the solar equipment, we also find several of the key components, such as solar panels, inverters, and racking systems. Solar panels are the components that harness and store the energy produced by the sun. Photovoltaic solar panels (PV), are composed of silicon semiconductors, which capture energy from the sun's rays.

How do I choose a solar energy system?

Knowing the different parts of a solar power system is the first step to choosing the best one. A grid-tied solar energy system includes solar panels, inverters, racking, a net meter, and a solar performance monitoring system. You'll need additional solar battery storage and a charge controller for hybrid and off-the-grid systems.

What equipment do I need to go solar?

We'll break down everything you need to know about solar equipment to prepare you. You need solar panels, inverters, racking equipment, and performance monitoring equipment to go solar. You also might want an energy storage system (aka solar battery), especially if you live in an area that doesn't have net metering.

What is a grid-tied solar energy system?

A grid-tied solar energy system includes solar panels, inverters, racking, a net meter, and a solar performance monitoring system. You'll need additional solar battery storage and a charge controller for hybrid and off-the-grid systems. We will discuss each component one by one as follows:
