

What is the global market for lithium-ion batteries?

The global market for Lithium-ion batteries is expanding rapidly. We take a closer look at new value chain solutions that can help meet the growing demand.

What is the future of the lithium-ion battery market?

The future growth of the global lithium-ion battery market looks promising with opportunities in consumer electronics, transportation, industrial, and other markets. The market is expected to reach an estimated \$340.4 billion by 2030, growing at a CAGR of 17.6% from 2024 to 2030.

How big is the lithium-ion battery market?

The global lithium-ion battery market is expected to reach a size of \$340.4 billion by 2030 with a CAGR of 17.6% from 2024 to 2030. The major drivers for this market are the rapid growth in electric vehicle production, rising demand for Li-ion batteries in industrial and power storage applications, and the decreasing price of Lithium-ion batteries.

What will drive the lithium-ion battery market?

Innovations such as solid-state batteries, silicon anodes, and longer-lasting cathodes are expected to drive the growth of the lithium-ion battery market in the coming years. The rising adoption of electric vehicles worldwide is a major catalyst for the market.

What are the emerging technology trends in lithium ion batteries?

The lithium-ion battery market is experiencing several emerging technology trends, including the introduction of lithium air batteries, usage of silicon alloy anodes in lithium-ion batteries, and new generation lithium-ion batteries with new families of disruptive active materials. These trends have a direct impact on the dynamics of the industry.

How big will lithium-ion batteries be in 2022?

But a 2022 analysis by the McKinsey Battery Insights team projects that the entire lithium-ion (Li-ion) battery chain, from mining through recycling, could grow by over 30 percent annually from 2022 to 2030, when it would reach a value of more than \$400 billion and a market size of 4.7 TWh. 1
