

# Analysis of the new energy battery enterprise landscape

How EV batteries are changing the competitive landscape?

The EV battery market has witnessed a substantial number of collaborations and acquisitions as companies aim to bolster their technological capabilities, expand their market reach, and streamline their supply chains. These strategic moves are not only altering the competitive landscape but are also fostering innovation and technology transfer. 1.

Are power batteries the core of new energy vehicles?

Power batteries are the core of new energy vehicles, especially pure electric vehicles. Owing to the rapid development of the new energy vehicle industry in recent years, the power battery industry has also grown at a fast pace (Andwari et al., 2017).

Is China's new energy vehicle battery industry coevolutionary?

Empirically, we study the new energy vehicle battery (NEVB) industry in China since the early 2000s. In the case of China's NEVB industry, an increasingly strong and complicated coevolutionary relationship between the focal TIS and relevant policies at different levels of abstraction can be observed.

How to improve the life cycle of the power battery industry?

At the same time, it is necessary to fully consider the characteristics and attributes of each stage in the life cycle of the power battery industry and to strengthen the connection between each stage to promote the healthy development of the industry. Maintain policy continuity after setting policy objectives.

Is there a theoretical basis for power battery policy research?

In summary, the literature provides an important theoretical basis for power battery policy research. However, previous research is far from systematic and in-depth. First, this research focused more on analysis of the technology, while research on policy is still scarce.

Why are Power Battery policies so complicated?

Because of their large number, policies for the power battery industry have become complicated. If policy elements are not reasonably designed and configured, certain negative effects might hamper the development of the power battery industry, leading to missed opportunities to guide and regulate the industry.

PDF | On Jan 1, 2022, Haojiangshan Huang published Investment Analysis of BYD : A New Energy Vehicle Enterprise | Find, read and cite all the research you need on ResearchGate

The ability of sustainable development is the core ability of an enterprise. CATL is the leader of new energy enterprises, which is representative in both technology and market.

# Analysis of the new energy battery enterprise landscape

The operational and sustainable development of new energy vehicle (NEV) companies represent crucial steps in the transportation sector's decarbonization efforts and in achieving carbon peak and carbon neutrality goals. In order to promote the diffusion of NEVs, China issued the dual credit policy in 2017. This paper takes the dual credit policy as a quasi ...

The results were as follows: (1) the Chinese government has gradually increased its focus on the power battery industry, concentrating on R& D and production in the early years and recycling in...

The research assesses BYD's innovative contributions to carbon neutrality through advancements in new energy vehicles, battery technology, and renewable energy solutions, emphasizing the ...

Competitive Landscape. The competitive landscape includes key players (tier 1, tier 2, and local) having a presence across the globe. ... Smart Energy Market Analysis and Global Forecast 2023-2033 - Data Pack Excel \$ ...

Wang Z. Analysis of Lithium Battery Recycling System of New Energy Vehicles under Low Carbon Background[C]// IOP Conference Series: Earth and Environmental Science. IOP Publishing, 2020 ...

The concerns over the sustainability of LIBs have been expressed in many reports during the last two decades with the major topics being the limited reserves of critical components [5-7] and social and environmental impacts of the production phase of the batteries [8, 9] parallel, there is a continuous quest for alternative battery technologies based on more ...

What are the opportunities and challenges for business cases for stand-alone battery energy storage systems (BESS) in European markets like Germany, Italy, France, The Netherlands, Romania and Austria? Expert Philipp Kraemer of CCE shares his analysis. The regulatory landscape for BESS in Europe is influenced by EU directives aimed at accelerating ...

PDF | On Jan 1, 2021, Tong An published The Strategic Group Analysis of BYD New Energy Vehicles From the Perspective of Value Chain | Find, read and cite all the research you need on ResearchGate

from 24.6% in 2020 to 32.6% in 2021 to 37% in 2022. The development of global new energy battery has set off a new upsurge, and the head effect of CATL is obvious. In 2020 and 2021, the TOP5 of power battery enterprises in China is the new energy of CATL, BYD, CALB, GOTION
