

Battery System Reliability Management Regulations

What is mandatory enforcement of safety requirements for battery energy storage systems?

August 18,2024: Mandatory enforcement of safety requirements for stationary battery energy storage systems,performance and durability requirements for rechargeable industrial batteries with a capacity greater than 2 kWh,LMT batteries and electric vehicle batteries,conformity assessment procedures, and economic operator obligations

What are battery safety requirements?

These include performance and durability requirements for industrial batteries, electric vehicle (EV) batteries, and light means of transport (LMT) batteries; safety standards for stationary battery energy storage systems (SBESS); and information requirements on SOH and expected lifetime.

What are the requirements for a rechargeable industrial battery?

Performance and Durability Requirements (Article 10) Article 10 of the regulation mandates that from 18 August 2024,rechargeable industrial batteries with a capacity exceeding 2 kWh,LMT batteries, and EV batteries must be accompanied by detailed technical documentation.

What should be included in a battery sustainability proposal?

The proposal seeks to introduce mandatory requirements on sustainability (such as carbon footprint rules, minimum recycled content, performance and durability criteria), safety and labelling for the marketing and putting into service of batteries, and requirements for end-of-life management.

What is the EU new battery regulation 2023/1542?

The European Union (EU) published the EU New Battery Regulation (EU) 2023/1542 on July 28, 2023, in the Official Journal of the European Union. The regulation came into effect just a few weeks later on August 17, 2023. It covers all batteries available on the EU market and aims to improve sustainability, safety labelling, and waste management.

What are the labelling requirements of the new EU batery regulation?

1 18.08.2025).The labelling requirements of the new EU Batery Regulation has entered into force from 18 February 2024. The detailed requirements and efective dates Efective dateArt. 13 (1): Bateries shall bear a labelcontaining the general information on bateries set out in Part
