

## Battery below what level can be replaced for free

Is battery replacement free under warranty?

As far as I can see battery replacement is always free when under warranty. Below is a (partial) screen shot of that list. On Apple's website, it says "If your iPhone is covered by warranty, AppleCare+, or consumer law, we'll replace your battery at no charge.". However, in their legal page, it says batteries are not covered under warranty.

Can I get a free battery replacement if my warranty is under 80%?

I have heard of people getting free replacements if the battery health is under 80% and their warranty was still valid. In the EU, the warranty is 2 years, so technically, if my battery health would fall below 80% within the two years, would I get a free battery replacement? Here is a link to the relevant Dutch (EU) site.

What if battery health drops below 80%?

If battery health drops below 80% before the end of the first year, contact Apple about a warranty replacement. (Apple will test it to determine its actual eligibility.) - If battery health drops below 80% (you will see a warning message) after the first year, consider getting the battery replaced but anticipate paying for it.

What if my battery capacity is below 80%?

If your battery capacity falls below 80% within the warranty period (1yr in the US, 2yrs with AppleCare+/2yrs in other markets or 3yrs with AppleCare +) Apple will replace the battery at no cost to you... You must log in or register to reply here. Register on MacRumors!

Can I use a device with a low battery health percentage?

You can still use a device with a lower health percentage than 80% but for optimal usage you may wish to consider having it changed when it reaches 80% battery health. What this basically means: - If battery health drops a few percentage per month that is normal.

What happens if a battery is out of warranty?

"The one-year warranty includes service coverage for a defective battery. If it is out of warranty, Apple offers battery service for a charge." In other words, if maximum capacity is below 80%, the battery is below normal performance and worth replacing. A notification will appear about this.
