

Can you buy a home with solar panels?

Some lenders won't offer mortgages to properties with leased panels, and those who do often have strict criteria. If you're planning to buy a home fitted with solar panels, you really should enlist the help of a qualified mortgage broker to navigate these complexities and find the right lender for you," Phil recommends.

Which solar panel is best for your home?

Monocrystalline panels are the most expensive and most efficient but are also the most common and comprise the best solar setup for home energy. Polycrystalline panels come in second and thin-film panels are the least efficient overall. Most solar panel manufacturers provide monocrystalline systems nowadays.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

How much do solar panels cost?

The average domestic solar panel system costs \$5,000 - \$6,000 for a 4kW system ideal for homes with 2-3 bedrooms. This can require between 8 (450W) and 10 (400W) solar panels.

Why should you buy solar panels for your home?

There are several great reasons to buy solar panels for your home. No doubt you've identified a number of attractive benefits during your initial research. Solar panels produce renewable, sustainable energy, which can help to reduce your home's carbon footprint.
