

# China starts producing solid-state batteries

Are Chinese companies ready for a solid-state battery?

Solid-state batteries are sensitive to moisture, so their manufacturers need special equipment to keep humidity away from production lines. While government initiatives should accelerate solid-state battery development, Chinese companies aren't waiting. Battery makers have already started formulating plans for the next-gen technology.

Will China make all-solid-state batteries by 2027?

However, their chief scientist Wu Kai said at the China International Battery Fair on April 28, that the firm was targeting small-volume production of all-solid-state batteries by 2027. This was the first time the battery maker had announced a mass-production timeline for the new type of battery.

How much money will China invest in solid-state batteries?

China plans to fund a project for developing solid-state batteries with an investment of more than 6 billion yuan (766 million euros). Six companies will be eligible for the government funding.

Is solid-state battery development accelerating?

Still, solid-state battery development is accelerating, and the big players in the battery industry might be further ahead in this game. Recently, CATL unveiled its proprietary semi-solid-state battery technology named "condensed battery." This uses a condensed electrolyte, allowing energy densities of up to 500 Wh/kg.

When will a solid-state battery come out?

CATL wants to start small-scale production of solid-state batteries by 2027. Around the same time, Japanese automakers, who have been very vocal about solid-state batteries for years, will also step into the race.

Will China produce EV batteries by 2027?

He disclosed that the company is aiming to "produce such frontier technologies in small quantities by 2027, and achieve mass production by 2030." Currently, China leads in power batteries, including lithium-ion ones, which are widely used in EVs.

TrendForce generally projects that solid-state batteries may enter mass production between 2030 and 2035, with an energy density of 500 Wh/kg, offering a driving range two to three times greater than existing ...

An employee works on the production line of an all-solid-state battery maker in Chongqing. [CUI JINGYIN/FOR CHINA DAILY] Accelerated efforts of both the Chinese government and the private sector are expected to lead to installation of all-solid-state batteries in electric vehicles by 2027 nationwide and mass production of such batteries by 2030 at the ...

Major Asian carmakers and tech giants - such as Toyota, Nissan and Samsung SDI - are racing to develop solid-state batteries. Trendforce, a Taipei-based intelligence provider, said late last week that pilot ...

German start-up develops the world's first solid-state battery ready for series production. Wednesday, 11 October 2023. ... HPB solid-state batteries and HPB solid ...

solid state battery; China's first solid-state battery production line starts operations The successor to lithium-ion By Rob Thubron November 21, 2018, 8:55 7 comments.

China plans to fund a project for developing solid-state batteries with an investment of more than 6 billion yuan (766 million euros). Six companies will be eligible for the government funding.

Hyundai aims to begin full-scale production of all-solid-state batteries in January 2025 and equip EVs with them by 2025, with mass production following in 2030. Updated: Dec 27, 2024 10:00 AM EST 1

All-solid-state battery . Gotion is hoping to start trial production of all-solid-state batteries by 2027 and is aiming for volume production by 2030, it was revealed, with the company publicly sharing its progress in the key ...

Volkswagen anticipates using solid-state battery technology starting from 2025; Nissan plans to initiate a pilot plant for solid-state batteries in 2024, aiming for mass production by 2028; Toyota ...

Employees work at Doctors Energy's battery production line in Tianjin.[Photo/China Daily] Chinese solid-state battery technology company Doctors (Tianjin) Energy Technology Inc plans to start all ...
