

Are electric curtains right for You?

Electric Curtains are perfect as a general convenience, for people who are less able-bodied and for people who are away from their property regularly and want it to look like someone is home.

How does an electric curtain track work?

An electric curtain track can be mains or battery-powered and open and close your curtains automatically at the touch of a button and the smart motor activated on a timer.

What are the best electric curtain tracks?

While there are many brands of electric curtain available, we sell the highest quality, most reliable and robust, and quietest tracks on the market, Silent Gliss and Somfy. Electric curtain tracks are made to order to your exact measurements for a perfect fit.

Do silent glide electric curtains have a remote control?

Silent Gliss Autoglides electric curtains come with different control options depending on the model you choose. The model B comes with a wireless button that can be mounted to the wall and removed at your convenience. The R comes with a wireless remote control.

Do electric curtain tracks come with a remote?

The R comes with a wireless remote control. The T comes with a programmable timer unit and the TC (Total Control) comes with all three control options including a remote control. All of these smart motorised curtain systems can be made to measure too. Do I need a Professional to Install an Electric Curtain Track?

Do you need an electrician to install electric curtain tracks?

If you choose our most popular Autoglides 5100 or Somfy Irisimo series of electric curtain tracks, you can install the curtains yourself with no need for an electrician. You just need competent DIY skills to drill the holes for the mounting brackets and fixtures and then the track just clips into place.
