What is a case study based on Xtreme POWER1?

Case study sources: Abe (2013); Clean Energy Action Project (2014). Duke Energy incorporated 36 MW/24 MWh of advanced lead-acid batteries provided by Xtreme Power1 into its Notrees 153 MW wind farm in West Texas. This was part of a testing and demonstration programme funded by ARRA.

Is battery energy storage a good investment?

Installation of a lithium-ion battery system in Los Angeles while using the automatic peak-shaving strategy yielded a positive NPV for most system sizes, illustrating that battery energy storage may prove valuable with specific utility rates, ideal dispatch control, long cycle life and favorable battery costs.

Can a battery lifetime analysis and simulation tool improve demand charge management?

A previous study used the Battery Lifetime Analysis and Simulation Tool (BLAST) developed at the National Renewable Energy Laboratory (NREL) to consider optimizing the size and operation of an energy storage system providing demand charge management. Battery degradation and capital replacement costs were not considered.
