

What is TagEnergy's 100MW battery project?

National Grid plugs TagEnergy's 100MW battery project in at its Drax substation. Following energisation, the facility in North Yorkshire is the UK's largest transmission connected battery energy storage system (BESS). The facility is supporting Britain's clean energy transition, and helping to ensure secure operation of the electricity system.

Can TagEnergy energise a battery storage project?

A battery storage project developed by TagEnergy is now connected and energised on the electricity transmission network, following work by National Grid to plug the facility into its 132kV Drax substation in North Yorkshire.

Can new energy storage technologies boost UK energy resilience?

However, new energy storage technologies can store excess energy to be used at a later point, so the energy can be used rather than wasted - meaning we can rely even more on renewable generation rather than fossil fuels, helping boost the UK's long-term energy resilience.

Is EDP Renewables launching a stand-alone battery energy storage project in Europe?

EDP Renewables has started the construction of its first stand-alone battery energy storage (BESS) project in Europe, a milestone that materializes the company's ambition to continue building a multi-technology portfolio to support the energy transition in all markets in which it operates.

What is a battery energy storage system?

Battery energy storage systems (BESS) are used to store energy from renewables, like solar and wind, and then release it when the power is needed most. Mark Selvaratnam, project manager of Lakeside Energy Park, said the facility would have a "significant impact" on the country's clean energy transition.

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support schemes will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

The Scottish government has given Kona Energy the green light for the construction and operation of the Smeaton battery energy storage system (BESS), a 228 MW/456 MWh project near Dalkeith, East Lothian. The ...

Nofar Energy (TASE:NOFR) is a global Independent Power Producer and developer of renewable energy assets, specialising in solar and battery energy storage. Nofar Energy has an operating ...

The final application deadline is March 14, 2025, at 5 p.m., ET. DOE expects to select projects for award negotiations by Q3 2025. For more information regarding the Long-Duration Energy ...

The Ontario government is advancing pre-development work for the proposed Ontario Pumped Storage Project, a partnership between TC Energy (TCE) and the Saugeen ...

Lakeside Energy Park's 100MW/200MWh facility is now the largest transmission connected BESS project in the UK following energisation. The new facility will boost the capacity and flexibility of the network, helping to ...

EDISON, N.J., Dec. 18, 2024 (GLOBE NEWSWIRE) -- Eos Energy Enterprises, Inc. (NASDAQ: EOSE) ("Eos" or the "Company"), America's leading innovator in the design, sourcing, and ...

EDP Renewables has started the construction of its first stand-alone battery energy storage (BESS) project in Europe, a milestone that materializes the company's ambition to continue building a multi-technology ...

2 May 2024 - RenewableUK press release. A new report published today by RenewableUK shows that the pipeline of battery projects has grown by two-thirds in capacity over the last year ...

5 ???&#0183; "As the largest battery energy storage site in the UK, the project will help the UK's ambitions of achieving a clean power system, providing critical flexibility to store energy when ...

6 ???&#0183; Fidra Energy and Sungrow formed a strategic partnership in November 2024 to implement 4.4 gigawatt hours of battery energy storage projects across the UK and Europe by ...

The CAISO project in Imperial County will complement the region's abundant renewable energy generation, improving grid stability. LOS ANGELES and SAN FRANCISCO, ...
