How does an electric vehicle charging pile work?

An electric vehicle charging pile provides two charging modes: regular charging and quick charging. Users can swipe a specific charging card on the human-computer interaction interface provided by the charging pile to carry out corresponding operations such as selecting the charging mode, charging time, and cost data printing, etc.

What is a public charging pile?

Public charging piles are purchased by public service organizations such as government for use by any electric vehicle owner, such as public parking lots.

What are the dimensions of the Charging Pile?

The dimensions of a 20kW Charging Pile are: Length (L) = 700 mm, Width (W) = 500 mm, Height (H) = 1650 mm. (Chart 7.1 Detailed Dimension Data of Charging Pile, Unit: mm)

What information does a charging pile display?

Information display screen Some charging piles are equipped with information display screens, which can display information such as voltage, current, real-time power, temperature, charging time, etc. Some can also display the working status of each phase of the three-phase charging pile.

How much does a charging pile cost?

The price of a charging pile can range from hundreds to thousands of RMB, with the main difference being in power. The cost of a 11KW charging pile is around 3000 RMB or more, a 7KW charging pile costs between 1500-2500 RMB, and a portable 3.5KW charging pile is priced under 1500 RMB.

What is the difference between charging pile and charging stations?

1. Charging pile refers to a charging device with a charging gun and a human-machine interface, which is simply an electrical device that can be charged, either in one piece or in a split type.

Charging pile energy storage system can improve the relationship between power supply and demand. Applying the characteristics of energy storage technology to the charging piles of electric vehicles and optimizing them in conjunction with the power grid can achieve the effect of peak-shaving and valley-filling, which can effectively cut costs.
