

Will Brazil's first capacity reserve auction affect battery energy storage?

Changes to Brazil's first capacity reserve auction of 2025 could undermine the expansion of the procurement regime to include battery energy storage systems (BESS) in the second exercise of the year, according to Markus Vlasits, chairman of Brazil's energy storage trade body.

How many GW of battery capacity were awarded in last year's auction?

In last year's auction 5.3 GW (12%) of capacity awarded contracts was from new-build units. Batteries saw the highest levels of new-build capacity, winning contracts by both derated (1 GW) and connection (5.6 GW) capacity. 5.7 GW of battery connection capacity received contracts across new-build and existing units.

How much battery storage capacity was catalyzed by Terna auction?

While Terna has not announced how much battery storage capacity was catalyzed by the auction, Rome-headquartered power generation company EP Produzione, a subsidiary of Czech energy group EPH, said it had won contracts for two projects. EP Produzione will build 170 MW of battery energy storage systems with a two-hour storage duration at two sites.

How many GW of battery capacity will Britain have by 2027?

Across all auctions so far, batteries will represent 16 GW of connection capacity in the Capacity Market by 2027. The total battery capacity operating in Great Britain currently stands at 3.6 GW. Eggborough OGCT makes up the largest proportion of capacity that exited the auction, at 282 MW.

What if T4 capacity entered the auction below the target?

With capacity entering the auction below the target for the first time ever in the T-4, a high price was guaranteed. 43.3 GW of capacity entered the auction, 700 MW below the 44 GW target. This was the first time the T-4 Capacity Market had less capacity entering the auction than the target.

How many GW of derated capacity won contracts in the auction?

Overall, 42.8 GW of derated capacity won contracts in the auction, but just 3.6 GW is new-build, representing 8% of awarded capacity. In last year's auction 5.3 GW (12%) of capacity awarded contracts was from new-build units.
