Gierkink et al. (2022; see also EWI, 2022, for an English summary) released a study in July 2022, in which Germany's electricity price, as predicted by an engineering model in the years 2026 and 2030 for different scenario variants, such as high or low commodity prices, moderate or high growth in electricity demand, different renewable electricity expansion paths, and variations in ...

Energy storage could save taxpayers in Germany some EUR3 billion (US\$3.3 billion) in subsidies for renewable energy assets by 2037, simply by increasing demand in the wholesale electricity market. That is according to a new report produced by consultancy Global Experts Energy Consulting (GEEC) for German developer and system integrator Eco Stor .

However, it argued that the prices peaked for only a few hours and would do little to alter the cost to households and most businesses, which usually have electricity supply contracts with a guaranteed long-term price. The average price of the past 12 months had been 75 euros/MWh. During the energy crisis year of 2022, it stood at 235 euros/MWh.

Electricity prices are from the EPEX intraday German market data for year 2019. The maximal profit from the energy arbitrage with given storage is 327 e. Storage state of charge it January 2019 ...
