A medium size hexacopter suited to many applications. Thanks to its foldable design it's easy to transport. ... Tarot 680 Pro Carbon Fibre Battery Mount - 10mm Clips

For hexacopters, solid-state batteries could be a complete game changer. A 20000mAh 22.2V 6S LiPo battery pack today weighs around 2.5 kg and gives a hexacopter roughly 20-30 minutes of flight time. An equivalent solid-state battery pack could potentially weigh half as much while providing an hour or more of flight time.

Minus points: In-built battery, limited life expectancy; A mini hexacopter is not the most common sight but it

probably should be. The Top Race &#174; Mini has a UFO type ...
