

What is a small Solar power system?

Each small solar power system is a complete kit that includes solar panels, inverter, batteries and the cables and fixings necessary to generate renewable energy. Our small solar panel kits are DIY but Sunstore can arrange professional installation for you if you prefer. This product has multiple variants.

What is a small off-grid Solar System?

Small Off-grid Solar Panel Kits and Systems. Includes Batteries Sunstore's small off-grid solar kits include all the components necessary to install and generate your own renewable energy. Each would produce enough power for a shed, garage, workshop, stable, remote office or other off-grid building with low energy demands.

What is the smallest solar power system you can buy?

100W - 500W off-grid solar kits are the smallest solar power systems you can buy. They are suitable for small installations such as garages, caravans, outhouses, boats and installations with very low energy requirements. As an example, a 100W solar panel kit could power a couple of light bulbs and perhaps a phone charger.

Are small house solar kits affordable?

Our small house solar kits are affordable and assembled as per your needs. Remember to shop The Inverter Store for the rest of your solar product needs, as we offer additional accessories such as mounting brackets, solar panel cables and connectors, and many more accessories to complete your off-grid home solar system today.
