

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 - £6,000. It can save the average household about £660 per year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2025, the price of solar panels in the UK can vary depending on several factors.

How much does it cost to install solar panels?

For the average 3.5kWp solar installation, business costs will come to approximately £2,450. The remaining 10-30% of the cost goes towards labour - the people who will actually fit your panels and the associated kit. This range should cover all domestic installations, including large jobs with more than 20 panels.

How much does a solar battery cost?

Solar batteries are an optional part of a solar system, but they can help you save even more money. If you opt for solar batteries, this will make up about 22 per cent of the system's expense. A battery suitable for a 3-bedroom home will typically cost around £2,500.

Why are solar panels so expensive?

Panel efficiency: The more sunlight a solar panel can convert into electricity per sq metre, the more expensive it will be. Panel number: More solar panels means more materials, which means a higher cost. You can limit the number of panels you need by choosing highly efficient ones (although they may cost more).

What is a solar panel cost calculator?

The solar panel cost calculator below will help you determine how much energy you can save, as well as the financial rewards you could potentially earn by installing a solar panel array on your property. Please bear in mind that the calculator will provide estimates based on the information you have provided.

How much money can you make with a solar panel?

If eligible, you can get grants that cover up to 100 per cent of your solar panel costs. Your annual savings, if you have SEG (not available in Northern Ireland) and a solar battery, can range between £809 and £970. You can expect a payback time ranging from 9.9 to 11.9 years. You can make a profit of more than £12,600 after 25 years.

How much do solar panels cost in 2025? A 7.2 kW solar panel system costs \$21,816 before incentives or \$3.03 per watt of solar installed. The federal solar tax credit lowers solar system costs by \$6,544, bringing the price down to ...

How Much does a Solar Panel Installation Cost in the UK? Now, that's out of the way let's look at some
