Can I ship a lithium ion battery by air?

For this reason, any battery that is suspected or known to be defective (swelling, corroding or leaking, for example) is not permitted for shipping within the DHL Express network. When you're shipping lithium-ion batteries by air, it's essential to follow specific regulations regarding their state of charge (SoC).

Is it cost-effective to ship a lithium battery?

It is, therefore, almost never cost-effective to ship a lithium battery that is not in the equipment it is designed for unless it is a critical or an emergency.

How do I ship a lithium hydride battery?

Choose a strong, double-walled box or container to hold all the contents securely. Seal the outer box with plenty of strong tape, and attach the correct shipping label clearly to the outside. For dry and nickel-metal hydride batteries, this will typically be a standard shipping label.

What happens if you transport lithium batteries overseas?

When you transport lithium batteries overseas they are classified as hazardous materials. This will mean that not all shipping companies will be able to handle them as it is very important that they are packaged and labelled correctly.

How much charge can a lithium ion battery have in transit?

(Picture credit: GWP Group) Lithium-ion batteries in transit may not exceed a defined maximum state of charge (SoC) - their level of charge relative to capacity. According to the IATA, the SoC must not exceed 30%, and it's the shipper's responsibility to ensure compliance with this regulation.
