## How to replace the solar power inlet pipe

How to install a solar water heater?

Install the pitch roof support with solar water heater cradle available from Kwikot at the marked position. Place the solar water heater into the cradle. 5. Important Installation Information In an Indirect system installation, the solar water heater must be fitted with an Expansion Relief Valve 100kPa on the left top side of the front end dome.

How to connect solar water heater & solar flat plate collector?

The solar water heater and solar flat plate collector panel/s or manifold for the solar vacuum tubes must be connected by using 22mm copper piping, 22mm female Conex fittings and/or 22mm copper elbows and tee-pieces and thermal pipe lagging. Page 10 THEMOSYPHON SPLIT SYSTEM METHOD-DIRECT & INDIRECT SYSTEMS WITH SOLAR FLAT PLATE COLLECTOR PANEL/S 1.

How to arrange plumbing in a solar loop?

There are two main choices for how to arrange the plumbing in the solar loop, drain-back and pressurised solar systems: When the pump is not running in a drain-back solar system, all of the liquid is inside the building and the solar panels are empty of fluid.

How to install solar water heater cradle?

Install the pitch roof support with solar water heater cradle available from Kwikot at the marked position Place the solar water heater into the cradle.

Can a solar water heater be installed in a higher position?

It is not always possibleor convenient to install the solar water heater in a higher position than the solar flat plate collector panel/s or manifold of the vacuum tubes (thermosyphon circulation method), so the pumped circulation method has to be used. Kwiksol Instruction, Installation & Warranty Manual...

How to prevent burst pipes in solar panels?

To prevent burst pipes in the solar panel the circuit is filled with antifreeze solution, around 40% by weight of propylene glycol will protect the solar panels down to -20°C. The volume of the solar fluid will change as its temperature changes, expanding when it heats up and contracting when it cools down.

Use a soft cloth or brush to gently remove any dirt or debris. If cleaning the solar panel doesn't work, then you may need to replace the batteries. Solar batteries don't last forever and will eventually need to be replaced. You ...

5/ Cut the pipes and fit 22mm compression Tee fittings to both the inlet and outlet pipes to the hot tank. Place gate-valves on both connections to allow future isolation of all new pipe work. Photo above shows the tank's cold supply teed off to a gate-valve. The pump is connected to the black rubber hose on the RHS.
