

# How to simulate the efficiency of solar power generation

What is the power conversion efficiency simulation of organic solar cells?

Power Conversion efficiency simulation. Optical simulation. Organic solar cells. This work presents the simulation of the power conversion efficiency of organic solar cells (OSCs), as well as the optimization of the thickness of active layer for better efficiency. The simulated OSCs uses P3HT: PCBM polymer as an active layer.

How can irradiance data be used to simulate a photovoltaic generator?

Create system-level model of a photovoltaic generator that can be used to simulate performance using historical irradiance data. Here the model is tested by varying the irradiance which approximates the effect of varying cloud cover. Power generation steps immediately following the irradiance change.

What is the simulated power conversion efficiency?

Variation of the power conversion efficiency with the range of 35-300 nm of the active layer's thickness (P3HT:PCBM). The thickness of 300 nm showed the best simulated efficiency, 4,36%. 5.

How can solar energy be used for future electrical power generation?

Key solution for future electrical power generation depends on alternative energy such as Solar Energy and renewable energy. Solar energy can be harvested by using a fast growing technique like Photovoltaic Plants(PV) in order to fulfill the demand of electrical energy.

Why is modeling a solar PV generator important?

Modeling, simulation and analysis of solar PV generator is a vital phase prior to mount PV system at any location, which helps in understanding the real behavior and characteristics in real climatic conditions of that location (Meflah et al., 2017).

What are the output results of solar PV model?

The final Solar PV model as depicted in Fig. 14 are simulated and obtained output results as current, voltage and power, due to the variation of radiation and temperature as input parameters (Adamo et al., 2011, Rekioua and Matagne, 2012). 5.1. Evaluation of model in standard test conditions
