Justrite's Lithium-Ion battery Charging Safety Cabinet is engineered to charge and store lithium batteries safely. Made with a proprietary 9-layer ChargeGuard(TM) system that helps minimize potential losses from fire, smoke, and explosions caused by Lithium batteries. [Shop Now](#)

How many batteries can a batteryguard cabinet hold?

Whether you have a great many batteries or just a few, large or small, the Batteryguard cabinet offers a solution for every situation. We offer compact models that charge 2 to 10 batteries and a spacious double-door safe where you can store up to 20 batteries.

How do I Keep my lithium-ion batteries safe?

Regular maintenance and safety checks are important to ensure a safe environment for storing and handling lithium-ion batteries. This isn't a one-off task but an ongoing commitment, so scheduling regular inspections of your storage solutions is key. It's also important to keep an eye on the batteries themselves.

How to prevent battery fires?

Bart van de Broek from Nationale-Nederlanden explains what you can do yourself to prevent battery fires. The most important measure is to charge the batteries in a special lithium safe. Batteryguard is such a lithium-safe that contains a battery fire inside the safe and prevents the fire from spreading to your business premises.

How can a lithium-ion battery storage system keep your workplace safe?

Using specialised storage and handling solutions like lithium-ion battery cabinets, fire suppression granules and lithium-ion battery charging stations, you're not just keeping your workplace safe; you're also ensuring these powerful little energy packs are treated with the respect they deserve.
