

Installing photovoltaic solar energy requires planning

Do you need planning permission to install solar panels?

Current rules that require businesses to apply for planning permission if solar panels will generate more than one megawatt of electricity will also be scrapped, meaning organisations will be able to install more solar panels on rooftops without the delay and cost of applying for planning permission.

Do I need planning permission for a solar PV project?

The rules apply to both solar thermal panels and solar PV. However, permitted development rights do not always apply as there are a few exemptions. If your project falls into one of these, you will require planning permission unless you can make any adjustments to your plans. Exceptions can include:

Do ground mounted solar panels need planning permission?

Ground mounted solar panels won't need planning permission (they'll be covered under Permitted Development Rights) as long as the installation adheres to the following: If your installation isn't going to abide by the above rules, then you'll need to apply for planning permission.

What are the requirements for a solar panel installation?

Before diving into the nitty-gritty, it's crucial to understand the basic requirements that must be met for your solar panel installation to fall under Permitted Development: Roofline Restrictions: Solar panels should not protrude more than 20cm above the existing roofline. Flat Roofs: For flat roofs, this limit extends up to 60cm.

Do solar panels come under 'permitted development'?

The key piece of legislation is The Town and Country Planning (General Permitted Development) (Amendment) (England) Order 2012. Our understanding of the legislation is that installing a solar PV panel system will now in most cases come under 'Permitted Development' if the installation is as below:

Can you put solar panels on a building?

Yes, if the installation falls under permitted development. However, if you live in a conservation area or world heritage site you can't put solar panels on the principal or side elevation walls of your house if it fronts a highway. This would require a planning application. Are there restrictions for solar panels on a listed building?
