

Is battery energy storage possible in Jordan?

In response to this, Fichtner in collaboration with the Jordanian Ministry of Energy and the transmission system operator, NEPCO, has analyzed the potential for battery energy storage and, in the role of Transaction Advisor, is providing support for implementing a pilot project.

Will a 30MW battery storage facility be built in Jordan?

Al-Kharabsheh told The Jordan Times the government had signed a memorandum of understanding with 23 international firms and consortia to build a battery storage facility with a capacity of "at least" 30MW "to help Jordan absorb more energy generated by renewable energy projects including solar and wind".

Will Jordan build a \$40 million battery facility?

Jordan's government has reportedly agreed on proposals for a \$40 million battery facility to push forward the country's energy storage ambitions. The government has signed a memorandum of understanding with 23 international firms and consortia to build a battery storage facility with a capacity of "at least" 30MW, according to The Jordan Times.

Could Jordan be a battery supplier for electric vehicles?

The country's energy and mineral resources minister, Saleh Al-Kharabsheh, said the move could help Jordan cash in as a supplier to battery makers for the growing electric vehicles market.

What are the problems with Li-ion batteries in Jordan?

Lack of the knowledge about the Li-ion batteries technologies in Jordan among engineers. Less than 50 % of the engineers think that the Jordanian technicians have enough information to install Grid/ Off Grid Lithium-Ion Batteries. Lack of policy, regulation and implementation of Li-ion batteries storage regulations.

Is lithium a good investment in Jordan?

Al-Kharabsheh told Jordan's official Petra news agency preliminary exploration in Al-Dubaidib, about 350km south of the capital Amman, "indicated the presence of high ratios of lithium and rare elements". Lithium extraction could also boost investment in the country's economic development, the minister said.

Lithium batteries roll off the production line at a new energy lithium battery industrial park on 28 August 2023 in Yichang, Hubei Province of China. Credit: Zhang Guorong/VCG via Getty Images. There are three major players in the global race to secure the electric vehicle (EV) supply chain: China and the US, followed by the EU.
