

## **Liability for breach of contract of solar power plant**

How much liability does a solar contractor have?

Therefore,EPC Contracts for utility-scale solar projects cap the Contractor's liability at a percentage of the contract price. This varies from project to project; however,an overall liability cap of 100%of the contract price is common. In addition,there are normally sub-caps on the Contractor's liquidated damages liability.

What happens if a solar EPC contractor fails to complete a project?

Solar EPC contracts generally provide fixed dates for project completion. If the contractor fails to complete on time,it will often be liable for liquidated damages (LDs),unless it is entitled to claim an extension of time to the completion date,thereby reducing or avoiding liability for LDs.

What happens if a solar company is liable?

Here are a few potential outcomes: If the court determines that your solar company is indeed liable for the issues you've experienced,they may award you compensationto cover the costs of any damages you've incurred. This can include repair costs,property damage,and any financial losses resulting from the solar installation.

What happens if a solar company fails to deliver a warranty?

If your solar company fails to fulfill their obligations as outlined in the contract,such as delivering the agreed-upon system or providing the promised warranties,you may have grounds for a breach of contract lawsuit. Did your solar company make false statements or misrepresentations during the sales process?

How do I file a lawsuit against a solar energy company?

This can include documents such as your solar energy contract, photographs of any damage, correspondence with the solar company, and any other relevant information. While you may be able to handle a small claim on your own, it's generally advisable to hire a lawyer who specializes in solar energy litigation.

Can I sue a solar company for misrepresentation?

If so,you may be able to sue them for misrepresentationor fraud. This can include exaggerating the energy savings or making false promises about system performance. In some cases,the installation of a solar system can cause damage to your property.
