

Which battery do I need for my car key?

If you already know exactly which battery you need, browse our range above. Energizer coin batteries are a go-to option for car keys. These lithium batteries are long-lasting, so you don't have to worry about your car key running out of steam anytime soon.

What type of battery does a key fob use?

Virtually all modern key fobs or "car remotes" as they're sometimes called are powered by button ("coin") cells with the "CR" designation. This denotes cells powered by lithium manganese oxide chemistry. These batteries provide 3V nominal power and very long service in a compact case.

Are Energizer batteries good for car keys?

Energizer coin batteries are a go-to option for car keys. These lithium batteries are long-lasting, so you don't have to worry about your car key running out of steam anytime soon. What battery is right for my car key? Different cars require different key batteries, so you can find out which suits your vehicle using the owner's manual.

Where can I buy a replacement car key battery?

At Halfords, we have everything to keep you on the move safely. If you need a replacement car key battery, look no further. We sell batteries to fit keys made by most leading manufacturers.

Does Halfords stock car key fob batteries?

If you need a car key battery replacement, then look no further. At Halfords, we stock car key fob batteries for the UK's most common car brands. Choose from our quality range of long-lasting Energizer batteries. Build your basket and select Trade Credit at checkout. If eligible, receive your Trade Credit limit instantly.

How long do car key fob batteries last?

Approve your order via SMS to finalise your purchase. Car key batteries typically last for around three to four years. So, if you're noticing that your key fob seems slow, or won't work at all, it might be time for a key fob battery replacement.
