

What is a mono crystalline solar panel?

Exide's monocrystalline solar panels are high power rating mono PERC solar panels that provide a higher energy generation advantage over polycrystalline solar panels due to their enhanced ability to absorb sunlight. These solar panels have a slightly higher efficiency than polycrystalline solar panels, at around 22%.

What is the difference between polycrystalline and monocrystalline solar panels?

In comparison to polycrystalline solar panels, Exide's monocrystalline solar panels have a higher power rating and greater efficiency in absorbing sunlight, allowing them to generate more electricity. Such panels are about a little more efficient than polycrystalline solar panels, at roughly 22%.

How much does a 210 AH battery cost?

210 Ah AGM Deep Cycle Rechargeable Battery -- p 15,800 (6-8 year lifespan) 210 ah gel cell deep-cycle batteries -- p 18,175 (12-15 year lifespan) All systems include 10 meters connection wire to connection point. Additional wire extra. VAT NOT INCLUDED
