

What is India's first commercial utility-scale battery energy storage system?

India's first commercial utility-scale battery energy storage system in Delhi to provide reliable power from renewable sources.

Does India need a battery recycling infrastructure?

The mission directly intersects with the need for battery recycling infrastructure in India. Solar PVs, wind turbines and energy storage systems are the clean energy technologies most important for India's net zero transition.

Is BSES launching a battery energy storage system in India?

Power distribution company BSES, which supplies electricity to nearly two-third of Delhi through its two subsidiaries, has started working on India's first utility-scale standalone Battery Energy Storage System (BESS), which is said to be the largest in south Asia.

Can battery recycling reduce India's import dependence?

By recovering critical minerals from discarded batteries, battery recycling can reduce India's import dependence, create a closed-loop supply chain of minerals and help meet the objectives of the Critical Minerals Mission.

What is Tata Power Delhi's battery energy storage system?

Tata Power Delhi Distribution Limited has installed a 150 kW/528 kWh battery energy storage system at Ranibagh Substation in New Delhi. The system will support the utility in managing the peak load, voltage regulation, power factor improvement, frequency regulation, and deviation settlement mechanism at the substation level.

Who makes nexcharge battery?

Nexcharge is a joint venture between Exide Industries, India's largest lead-acid storage battery manufacturer, and Leclanché, one of the leading Lithium-ion (Li-ion) battery manufacturers based in Switzerland. The 150 kW/528 kWh battery energy storage system at Tata Power-DDL's Ranibagh Substation benefits both customers and the utility.
