

Will Illinois get a new battery manufacturing plant?

An electric vehicle is pictured charging in Chicago. (Andrew Adams /Capitol News Illinois) A new battery manufacturing plant is set to open in northern Illinois next year after the state offered more than \$330 million in tax incentives to make it happen.

How many jobs will a new battery plant create in Illinois?

The roughly \$2 billion project is set to create 2,600 jobs and begin production in 2024. The plant will produce battery cells, battery packs like the kinds used in electric vehicles and large-scale energy storage systems. Gov. J.B. Pritzker on Tuesday called the development "the most significant new manufacturing investment in Illinois in decades."

Where is Gotion battery manufacturing located?

Gotion, a Chinese battery manufacturing and development company, announced on Friday that it will build a lithium-ion battery manufacturing facility in Manteno, about 50 miles south of Chicago. The roughly \$2 billion project is set to create 2,600 jobs and begin production in 2024.

Will a bill increase battery capacity on Illinois' electric grid?

Sen. Bill Cunningham plans to push forward a bill to significantly increase the battery capacity on Illinois' electric grid. He considers it a necessary complement to the 2021 Climate and Equitable Jobs Act, which set a 2045 goal to shutter fossil fuel plants and expand renewable energy but did not include significant provisions for energy storage.

Will Illinois build a new EV hub?

"As part of Illinois' commitment to build out comprehensive EV hubs and support Illinois' workforce, the state will also fund a new manufacturing training academy nearby, as well as award an additional grant to workforce providers to expand training and prepare regional employees for the new jobs," the statement said.

How much battery does Illinois need to reach net-zero emissions?

Meanwhile, Meng estimates reaching net-zero emissions will require 200 to 300 terawatts worth of batteries globally. The United States' battery capacity is only slightly above 15,000 megawatts, with Illinois clocking in at 100 megawatts. The bill aims to increase the state's battery capacity to 8,500 megawatts, enough to charge 130 million laptops.

The new venture will develop, build, own, and operate utility-scale energy storage projects in North America. Hecate Energy ("Hecate") and InfraRed Capital Partners ("InfraRed") ...

US renewables developer New Leaf Energy has developed a portfolio of battery storage projects in Texas, also called the Lone Star State, totalling 64 MW. Search. Alerts. Search. ... New Leaf Energy unveils 64-MW ...

"The addition of the Montague project brings valuable ancillary services to the PJM market, enhancing the reliability of the grid while also supporting the transition to a ...

The combined \$175 million project enables NanoGraf to produce 2,500 tons of silicon anode material to support up to 1.5 million EVs per year NanoGraf Team NanoGraf ...

On a plot adjacent to vacant lots located just south of 38 th Street on Chicago's South Side, a new mural celebrates some of the most prominent Black figures of Chicago's ...

The battery energy storage system is expected to help reduce the chance of power outages in Santa Cruz County and provide renewable energy to the existing power grid ...

The Energy Storage Research Alliance will focus on advancing battery technology to help the U.S. achieve a clean and secure energy future and become dominant in ...

Battery energy storage projects are expected to increase employment in Illinois by 32,417 individuals and 115,329 full-time equivalent years and support an increase of \$3.9 ...

Federal funds boost Chicago company's lithium-ion battery production CHICAGO (CBS) -- Billions of federal dollars are being awarded to clean energy projects ...

NanoGraf calls itself an advanced silicon anode battery material company that says it enables "stronger, lighter, and longer-lasting lithium-ion batteries." The company is ...

We Energies also recently filed plans with the Public Service Commission of Wisconsin to build a bevy of new clean generation that would add more than 500MW of solar power and 180 MW of wind power to the grid, ...
