

New Energy Check whether the battery is original

How do I know if a new battery is good?

In any case, when you get a new battery, your FCC (full charge capacity) should be ~5000 maH, and Apple quality batteries are designed to maintain 80% of the original full charge capacity after 300 cycles for your particular Macbook. You will be able to find the FCC in the same location where you provided the information above.

How do I know when a battery was made?

You can look at the battery case to identify a string of numbers or letters that detail when the battery was made. Different batteries use different codes to mark the production date. To protect yourself, google the battery number found on the case before buying.

How do I know if my laptop battery is counterfeit?

To identify counterfeit laptop batteries and determine if your laptop battery is original, look for packaging differences, check for variations in information, inspect the branding, verify the QR code, compare the logo, and review the date code. Additionally, pay attention to weight, charging time, and the overall quality of the battery.

How do I know if my laptop battery is original?

When determining if your laptop battery is original, there are other factors to consider. These include packaging differences, QR codes, branding, and side-by-side comparisons with genuine batteries. It is important to pay attention to these details to ensure you have an authentic battery for your laptop.

What is the difference between OEM and original laptop batteries?

OEM batteries are made by the device's manufacturer and come with the device when purchased, while original batteries are sold by the manufacturer as official replacements. How Can I Check My Laptop Battery Serial Number?

How to check laptop battery serial number?

To check your laptop battery serial number, follow these steps: 1. Turn off your laptop and flip it over to access the battery compartment. 2. Remove the battery from the laptop. 3. Look for a sticker or label on the battery. 4. The serial number should be printed on the sticker. 5. Take note of the serial number for future reference.
