

What is the energypak plus range extender?

The EnergyPak Plus range extender is a lightweight and compact backup battery that attaches to your E-bike so you can worry less about running out of battery on epic rides. With 250Whr of additional capacity, the EnergyPak Plus boosts your range by 40 percent for bikes with the standard EnergyPak Smart 625Whr battery.

Can a range extender be used without a main battery?

your proposal might not work for Bosch Range Extender. - If Range Extender is enabled in the Software configuration it CAN be used without the main battery BUT Motor power output is reduced to 80% then ! This implies to me, that the Motor is aware, that a range extender is connected even when a first/main battery is not present.

Why is range extender used in parallel with the main battery?

I assume Range Extender is used in parallel with the main battery, because it is too weak for normal dual battery operation. - I was unable to find out, if a motor that is not range extender enabled is also blocked for dual battery. These might be two different settings in the software.

Does energypak plus increase range?

With 250Whr of additional capacity, the EnergyPak Plus boosts your range by 40 percent for bikes with the standard EnergyPak Smart 625Whr battery. Ready to install your own EnergyPak Plus range extender? Learn how with our step-by-step guide below. Remove your existing E-bike battery.

What is a T-power range extender?

The T-Power is the nominal 270 Wh range extender developed and guaranteed by THOK to be compatible with all models in the range with batteries of any capacity. The THOK research and development department worked on the T-Power project for more than a year.

Does Bosch range extender work without battery?

It might not work for Bosch Range Extender. - If Range Extender is enabled in the Software configuration it CAN be used without the main battery BUT Motor power output is reduced to 80% then ! This implies to me, that the Motor is aware, that a range extender is connected even when a first/main battery is not present.
