

**What is the Energy Storage Summit 2025?**

The Summit will be a major networking event, bringing together over 2,000 stakeholders from across the energy storage value chain. This 10th anniversary event takes place February 17-19, 2025, at the Intercontinental London - The O2.

**What is the Energy Storage Summit?**

Our Summit aims to highlight the fundamental role that energy storage will play in this journey, and will strive to recognise, explore and analyse key challenges that may present themselves on the trajectory ahead. One scenario estimates Europe will reach 29.6 GWh of installed capacity by the end of 2024, marking a 72% increase YoY.

**When is ESI partnering with the Energy Storage Summit 2025?**

ESI will again be partnering with the Energy Storage Summit and the 2025 edition will be taking place in the Intercontinental London - The O2 from the 17th to the 19th February. The Summit will be a major networking event, bringing together over 2,000 stakeholders from across the energy storage value chain.

**Why should you attend the Energy Storage Summit?**

Over the past ten years, the Summit has gained recognition as the biggest, busiest, most informative, and best networking event in the European energy storage sector, where deals are made on site; generating efficient business for everyone who attends. Workshops, an after-party, private networking dinners and much more!

**What's happening at London's Energy Storage Summit?**

There is something for everyone at the Summit. One of London's most exclusive nightclubs. All delegates are invited to attend this event, hosted by Envision, on Tuesday 18 February - get ready for good vibes and a great playlist! This is an event where you are guaranteed to meet over 2000 delegates from across Europe's energy storage value chain.

**Can I present a case study at Energy Storage Summit Germany?**

If you would like to present a case study or be part of a panel session at our Energy Storage Summit Germany, then please get in touch with the team today. Historically driven by residential demand, utility-scale projects are now beginning to surge, with nearly 16 GWh of capacity installed in the first half of 2024.
