International Fire Code (IFC) 2021 1207.8.3 Chapter 12, Energy Systems requires that storage batteries, prepackaged stationary storage battery systems, and pre-engineered stationary storage battery systems are segregated into stationary battery bundles not exceeding 50 kWh each, and each bundle is spaced a minimum separation of 10 feet apart and from the building wall.

NEW YORK, NY, June 27, 2023, 6:06 PM ET--On the evening of June 26 th, fire alarms went off at two of the battery storage systems we own and operate in Warwick, New York. The fire suppression units within the affected battery containers at both sites were activated. We have deployed our safety protocol and are actively monitoring the sites.

Fire Alarm Battery Types: Alkaline batteries are commonly used in compact units, while lithium-ion batteries offer long life and low maintenance but come with higher costs and complex recycling needs. Indicators and ...
