

New policy for household installation of solar photovoltaic

Should a new home require solar PV panels?

The 2023/24 consultation on the detailed specification for the FHS sought views on whether to require solar photovoltaic (PV) panels for new homes. Solar PV generation turns the sun's energy into electricity. Option 1 would have required solar PV panels covering the equivalent of 40% of a new home's ground floor area.

What is a solar photovoltaic Bill?

A Bill to require the installation of solar photovoltaic generation equipment on new homes; to set minimum standards for compliance with that requirement; and for connected purposes.

Can you install solar panels without planning permission?

The rules for homeowners specifically allow houses, bungalows, or apartments with flat roofs to install solar panels without planning permission. This removing the roughly eight week wait time that most owners have had to suffer through, as well as removing many of the additional costs that may initially put people off of going solar.

What is the private members' bill on new homes (solar generation)?

This Library briefing provides an overview of the bill and key areas of debate. The Private Members' Bill on New Homes (Solar Generation), sponsored by Max Wilkinson (Lib Dem), will have its second reading on 17 January 2025. The government has set a mission to make Britain a clean energy superpower.

Are solar photovoltaic panels part of a default package?

Solar photovoltaic (PV) panels are expected to be part of a default package to meet forthcoming rules on the energy efficiency of homes and buildings in England, according to Government plans.

How can the government support the installation of solar panels?

The government has several schemes to support the installation of solar panels. This includes the Energy Company Obligation (ECO), and the Warm Homes: Local Grant and the Warm Homes: Social Funding.
