

What is the battery capacity of Nubia's upcoming mobile device?

The upcoming mobile device from Nubia is expected to run the Android v8.1 (Oreo) operating system and comes with a 3800 mAh battery that will let you use the device for long hours for playing games, listening to songs, watching movies, and more without worrying about battery drainage.

How much does a Nubia watch cost?

The Nubia Watch price is \$399 (roughly ₹3,300 / AU\$550 - the website lists the price in US dollars no matter where you are), although pre-ordering it as part of the Kickstarter campaign gets you a discount, with the amount depending on how early you ordered it.

How long does the battery of a Nubia N1 last?

The Nubia N1's battery lasts for up to 3 days with medium-duty usage, thanks to Nubia's new battery technology - NeoPower, which includes a 5000mAh battery, excellent system optimization, low power consumption, and high performance hardware.

What is the price of Nubia X in India?

Nubia X is the upcoming mobile that is a great combination of functionality and style. It is expected to be launched in India on January 21, 2020, at a starting price of Rs 34,990. You will be able to buy this lightweight, sleek and stylish phone in different color options.

How much does a Nubia 5s cost?

The good news is that with the hardware refresh, Nubia isn't charging more for this model. It costs just as much as its predecessor starting at \$579/EUR579 for the base version with 8GB of RAM and 128GB storage. However, the competition since April this year has changed a lot too. Now the 5S has to face tougher rivals such as the Asus ROG Phone 3.

Does Nubia have a NeoCharge Charger?

Nubia has launched a new accessory, the GaN Pro 65W Triple-Ports Charger. As this name might suggest, it is a new power brick with up-to-date gallium nitride technology that can charge devices at up to 65 watts (W) with what Nubia called "NeoCharge" tech.
