

Why is a US company building a solar panel factory in Panama?

July 26 (Reuters) - A small U.S. solar company with no manufacturing experience on Tuesday announced plans to open a solar panel factory in Panama to help the American industry reduce its reliance on Chinese-made goods.

Where are solar panels made?

Though solar panels are assembled in several Asian countries, the industry's raw material, polysilicon, is primarily produced in China and has been tied to concerns about forced labor in the Xinjiang region.

What is universal solar America?

Universal Solar America LLC, an Arizona company that helps solar project developers procure panels, said its planned facility will help U.S. companies avoid tariffs, shipping delays and other challenges that have scuttled a supply chain comprised primarily of products made in Asia.
