

Photos of the new energy battery back-end workshop

What is a battery workshop?

The workshop will include participants from across the battery ecosystem and cover a range of topics, including mechanisms for effective battery deployment and strategies for supporting battery supply chains. The findings from the workshop will serve as an essential input for the IEA's upcoming Battery Special Report.

Why is the nuclear back-end important?

Far from being a hurdle, the nuclear back-end serves as a driving force for technological progress. Existing sites and current challenges provide ideal environments for the rapid development and application of new technologies.

When will the IEA's battery special report be published?

The IEA will convene leaders from government, industry, the financial sector, international organisations and academia for a workshop to inform the IEA's Battery Special Report, to be published in the first half of 2024.

How can battery technology help decision makers?

While the world continues to scale up the deployment of batteries, there is already a wealth of technical and market experience to guide decision makers. Sharing key challenges and cutting-edge solutions can help identify priorities and best practices.

A lead battery-powered energy storage facility in Saxony, Germany is providing 16 megawatts of battery energy storage to help smooth out peaks and troughs in energy ...

Read more about these highlights and see the photos of all events below. ALBA technical topics overview The main workshop on Wednesday and Thursday intercalated plenary talks and interactive breakout sessions on a breadth of ...

Be Energy's NiMH battery regeneration workshop in Avignon covers more than 200 m². The modular facility can store more than 1,000 prismatic or cylindrical cells, enabling ...
