

Could solar power keep the planet powered for generations to come?

According to Hegen, solar power has the potential to sustainably power the planet for generations, as in a single hour, the amount of power from the Sun that strikes the Earth is more than the entire world consumes in a year. My Modern Met features Hegen's mesmerizing aerial photos of enormous solar farms.

Why did John Deere visit solar farms?

John Deere was inspired to visit solar farms after encountering a cluster of solar fields near the French Alps. It struck him that they looked like endless waves on the hilltops and he set out to look for others. His journey took him to Spain and the United States.

Why is the solar power series so special?

The Solar Power Series, as depicted in the article, is oddly mesmerizing due to the panels being arranged in concentric circles or neat rows. The repetitive pattern on the landscape is soothing yet also an odd transformation at the same time. This series highlights the environment's alteration by man, but perhaps for a greater good.
