What are rechargeable batteries?

Our rechargeable batteries provide a cost-effective and environmentally friendly alternative to traditional disposable batteries. We stock a variety of sizes and types to suit all your needs, including: Rechargeable AA Batteries: Ideal for high-drain devices like digital cameras, game controllers, and toys.

Are rechargeable batteries better than disposable batteries?

Rechargeable batteries also self-discharge more quickly than disposable batteries. This means that they lose energy when not in use. For this reason, energy-intensive devices that you use often are the most suited to a set of rechargeable batteries. Find out more by reading our article, the best AA and AAA rechargeable batteries.

Should you buy a rechargeable battery?

You can focus on other things than getting replacement batteries. Rechargeable batteries are a type of electrical battery which can be charged, discharged. They have a much lower total cost of ownership instead of constantly having to purchase replacements.

How long do rechargeable batteries last?

If you stockpile batteries, rechargeables aren't the best bet. We generally find that 15-20% of a rechargeable battery's capacity declines over two years in storage. In comparison, alkaline batteries last 5-10 years in storage, while lithium disposable batteries last between 10 and 20 years.

Are rechargeable batteries eco-friendly?

Rechargeable batteries are eco-friendly power sources that can be reused multiple times. Commonly available in standard sizes like AA and AAA, they reduce waste and can help save money in the long run. Rechargeable batteries are suitable for various devices and offer a sustainable and cost-effective alternative to disposables.
