What type of battery should I buy?

Shop around for AA and AAA batteries and the main types you'll find are alkaline and lithiumdisposable batteries. Lithium batteries last a lot longer in more energy intensive devices. We've found that they can give you 2-3 hours more power than an alkaline battery. But they're also much more expensive.

What are the different types of battery sizes?

Standard battery sizes include AA batteries (or "double A"), which account for over 50% of general battery sales, AAA ("triple A") and D batteries. Miniature batteries, rechargeable batteries and standby power centers are other types.

Which rechargeable batteries should I buy?

For a busy household that's always pressing play, consider a larger set of rechargeable batteries to avoid quarrelling. HiQuick offers eight rechargeable AAAs complete with a universal intelligent battery charger that can recharge depleted batteries in three hours. Each one offers 1100mAh of power.

Which battery size should I buy?

AA batteriesare likely the most popular battery size,given their widespread use in a variety of electronic devices. They don't hold as much charge as a C or D battery,which means you're probably going to be replacing them a lot. Again,it comes down to bulk price and performance.
