Requirements for seaborne export of lead-acid batteries

What happens if you export a lead-acid battery for reclamation?

For exporters of spent lead-acid batteries (SLABs) for reclamation, this means that export shipments of SLABs will be prohibited after the effective dateunless the exporter has submitted a notification and obtained consent from EPA and the receiving country.

What are the RCRA regulations for spent lead-acid batteries?

The RCRA regulations for spent lead-acid batteries (SLABs) by requiring notification and consentfor the export of SLABs to ensure that the batteries are managed in an environmentally sound manner.

What is a lead-acid battery?

Lead-acid batteries are secondary,wet cell batteries,meaning they can be recharged for many uses and they contain liquid. They are the most widely used rechargeable battery in the world. Lead-acid batteries are mainly used as starting, lighting, and ignition power batteries found in automobiles and other vehicles.

How are lead acid batteries transported?

The transportation of lead acid batteries by road,sea and airis heavily regulated in most countries. Lead acid is defined by United Nations numbers as either: The definition of 'non-spillable' is important. A battery that is sealed is not necessarily non-spillable.

What types of batteries are required for shipping?

The requirements apply to lead-,lithium-,nickel- and sodium-based batteries. Free of charge,BatteriesTransport.org offers general information for shippers,transport operators and end-users.

What is a non-spillable lead acid battery?

Non-spillable lead acid batteries (those that use Gel or Absorbent Glass Matt technology) require the same packaging as those filled with acid with the following differences: No acid proof liner is required. The box must be clearly marked "Non-spillable battery".

In the domain of battery exports, proper packaging is not just a suggestion - it's a necessity. To guarantee fail-safe transportation, we must meet international packaging standards for battery ...

The presentation covers the Requirements and Standard Operating Procedure for the Import of Lead Scrap/Used Lead Acid Batteries in India in compliance to the provisions of the Basel Convention as well as the ...

Used lead acid batteries (ULABs) are a hazardous waste. The Hazardous Waste (Regulations of Exports and Imports) Act 1989 and Hazardous Waste (Regulation of Exports and Imports) ...
