

Are solar panels a good investment?

Over the past decade, the cost of solar power has halved, making it a more attractive option for homeowners. With gas prices on a rollercoaster and climate change concerns mounting, solar panels are expected to become even more cost-effective in the future. After installation, solar panels start saving you money on energy bills immediately.

How much do solar panels cost in the UK?

According to the Energy Saving Trust, the average solar panel system in the UK is 3.5kWp, with an overall average cost of £7,000. That can rise to as much as £9,000 for a 5kWp system if you have a larger home. These figures represent the total cost, including the panels themselves and the installation costs, which can be substantial.

Do you need an inverter for a solar panel system?

You'll also need an inverter as part of your solar panel system, as this is what converts solar energy into the AC electricity used by the grid. Solar batteries are an additional investment that allows you to store surplus solar energy for later use or to sell back to the National Grid.

Can solar panels save you money?

Solar panels could help you save £100s a year on your electricity bills. Using the energy you generate can mean big savings for some households. You can get paid to export electricity you generate but don't use through the smart export guarantee (SEG). An average home could earn up to £320/year.

Are solar batteries a good investment?

Solar batteries are an additional investment that allows you to store surplus solar energy for later use or to sell back to the National Grid. Starting at £4,000, solar batteries mean a longer time to break even when combined with the cost of solar panels.

Do solar panels increase property value?

Solar panels are attractive to potential new homeowners when you next sell your home, which can increase your property value as a result. That might seem like a long time, but it's worth remembering that solar panels can provide all of your energy needs, making your home potentially energy self-sufficient.
