

What are solar powered street lights?

Easy to install just mechanical fixing no mains powered wires. Dragons Breath Solar powered street lights have been designed to adopt powered illumination using only the sun's energy. These provide us with the ability to design street lights and road lighting are for uses across the UK.

Why should you use a solar powered street light unit?

These are designed to cut the excessive use of mains power that is currently being diluted from the national grid system to power existing sodium street light units. By using one of our solar powered light units, you will help to make existing urban light polluting Sodium Street lighting obsolete and a thing of the past.

How to install a solar street light?

To install the foundation of your solar street light, choose a level and flat ground, with no inclination. Screw and secure the Basis Cage to the ground using the four screws. One side of the Basis Cage should be parallel to the edge of the road. Secure the Basis Cage with concrete, and this will serve as the foundation of your street lamp.

Do solar street lights work in the UK?

Our outdoor solar lights are manufactured using the latest high-performance LED chipped units and they can perform during both summer and winter. Solar street lamps can be programmed to consistently operate (from dusk until dawn) at any location in the UK so the area can remain safe while conserving energy. Do you need a specific bespoke design?
