

How do I use a solar car battery charger?

If you're wanting to use a solar battery charger the first thing to remember is to turn your engine off before plugging the solar car battery charger in.

Can a solar car battery charger keep a car battery topped up?

Boasting a very impressive 10 watts and an enviable price tag, this solar car battery charger is a good way of keeping a car battery topped up. While it can only connect via a 12V socket or battery cables, it will keep a battery from losing charge.

Do solar car battery chargers work?

Yes, solar car battery chargers do work, but their effectiveness depends on a few factors, including the quality of the charger, the size and condition of the battery, and the amount of sunlight available. What is the best solar charger for a car?

Where should a solar car battery charger be placed?

If you're connecting your solar car battery charger to your OBD or 12V socket then the best place to place the panel is on the dashboard because it'll capture the most amount of light and the charger will reach the sockets.

Why do I need a solar battery charger?

Both connections will ensure that the car is being charged whenever there's sunlight as both connections bypass the ignition, a required source for other solar battery chargers (like a 12v socket).

Are solar car battery chargers eco-friendly?

A CS Free is useful to take to the campsite thanks to its great power bank capabilities, and topping up the power using the sun is the most eco-friendly way you can go about it. Boasting a very impressive 10 watts and an enviable price tag, this solar car battery charger is a good way of keeping a car battery topped up.
