

# Solar energy prices vary widely by quality

How much do solar panels cost?

Solar panels usually make up about a third of the total cost of the project. So if you live in a 3-bedroom house, and pay £7,100 for your system and installation, you can expect the cost of your solar panels specifically to be around £2,400. However, the actual price depends on the efficiency, power and brand of your solar panels.

How much does a solar system cost per square meter?

Solar system costs per square meter can vary widely, typically ranging from EUR400 to EUR1,000, depending on factors such as panel efficiency, installation complexities, and regional price differences. When Is a Solar System Worth It? A solar system is worth it when long-term energy savings outweigh initial costs, typically within 5 to 10 years.

Why are solar panels so expensive?

Solar panels are expensive because they require a complex installation that generally takes place on your roof. This process throws up a large number of associated costs that you have to pay if you want your system to work effectively.

How much does a solar & battery system cost?

The average cost of a 3kWp solar panel system for a typical property with two or three bedrooms is about £9,000, including installation. This jumps up to around £11,000 if you're adding a 5kWh battery. This is a great time to get a solar & battery system, as there's currently 0% VAT on both panels and batteries.

Are solar panels worth it?

In short, solar panels are worth it for most UK homeowners, especially those with high electricity usage and a south-facing roof. Even in those less sunny areas, solar panels typically lead to significant savings for the long-term. Why choose Soly for your solar panel needs?

How much does a solar system cost in the UK?

Starting with some base figures, solar systems in the UK start around the £3,500 mark but often top out at £20,000. To put that in perspective, let's look at a case study of a typical UK house. Please note: these figures don't consider the average annual (est. 3.6-10%) increase in electricity costs from providers.
