

What is a solar installation drawing?

These drawings serve as the foundational blueprint for the entire solar installation process, providing structural and electrical engineers with essential guidance to ensure successful project execution.

Why do solar companies need as-built drawings?

By proactively addressing safety considerations through as-built drawings, solar companies can safeguard both personnel and assets. In conclusion, as-built drawings serve as indispensable assets in the realm of solar structural engineering, underpinning the success and sustainability of solar installations.

What is an as-built solar project?

For solar projects, these drawings detail the layout of solar panels, support structures, wiring configurations, and other critical elements of the photovoltaic (PV) system. One of the primary functions of as-built drawings is to validate the design intent against the actual implementation on-site.

Is solar engineering a non-negotiable project?

Compliance with building codes, zoning regulations, and industry standards is non-negotiable in solar engineering. As-built drawings provide essential documentation to demonstrate compliance with regulatory requirements governing structural integrity, electrical safety, and environmental considerations.

Are as-built solar drawings accurate?

In the realm of solar engineering, where precision and efficiency are paramount, the significance of accurate as-built drawings cannot be overstated.

How much space does a photovoltaic system need?

Photovoltaic modules installed on the ground or on a flat surface occupy an area of approximately 20 m²/kWp, avoiding shading between the rows of modules. The design of a photovoltaic system, from the public operator's network to the photovoltaic modules, requires careful planning and compliance with local regulations.

For this solar installation, we developed a complete set of electrical and structural drawings. The system was designed for high efficiency, with attention to shading analysis and energy storage ...
