

What is solar photovoltaic (PV) technology?

With an installed capacity greater than 137 gigawatts (GWs) worldwide and annual additions of about 40 GWs in recent years, solar photovoltaic (PV) technology has become an increasingly important energy supply option.

How has solar energy generating capacity grown since 2009?

Nature 598,604-610 (2021) Cite this article Photovoltaic (PV) solar energy generating capacity has grown by 41 per cent per year since 2009 1. Energy system projections that mitigate climate change and aid universal energy access show a nearly ten-fold increase in PV solar energy generating capacity by 2040 2,3.

Are solar photovoltaic (PV) power generation units a challenge?

The modern power markets introduce higher penetration levels of solar photovoltaic (PV) power generation units on a wide scale. Along with their environmental and economic advantages, these variable generation units exhibit significant challenges in network operations.

Can energy storage systems improve solar PV power plants?

When incorporated with large-scale PV plants to form intelligent PV power plants, energy storage systems (ESS) can contribute to the economic improvement of solar PV power plants and enable them to participate in the electricity markets like conventional generators.

Can a global solar PV census be used as a starting point?

We conclude that our dataset provides an initial global census of commercial-, industrial- and utility-scale solar PV installations, and can be used as a starting point for a more exhaustive, feature-rich inventory of global solar PV. See Supplementary Information for further details.

What is the IEA photovoltaic power systems programme?

The IEA Photovoltaic Power Systems Programme (IEA PVPS) is one of the TCP's within the IEA and was established in 1993. The mission of the programme is to "enhance the international collaborative efforts which facilitate the role of photovoltaic solar energy as a cornerstone in the transition to sustainable energy systems."

Refer to Wang et al. (2016), we used the following two criteria to determine whether an enterprise is a listed solar photovoltaic enterprise or not: first, we searched using keywords, solar and photovoltaic, including enterprises in the concept stocks of solar power generation; second, we searched using keywords, monocrystalline silicon, polycrystalline ...
